

DONOHUE HEATING SERVICES ELECTRIC RADIATOR DATA SHEETS

Thermonet® is a premium quality electric underfloor heating mat, the only one in the UK to feature our unique TwistedTwin conductor cable technology.

- ✓ Unique TwistedTwin Cable
- ✓ Low profile cold tail connection
- ✓ Lifetime Warranty
- ✓ High grab self adhesive mesh
- ✓ Simple installation process
- ✓ Made in our factory in Germany

ADDITIONAL HEATING 100W/m²

When an existing primary heating system is in place, such as central heating, Thermonet® EZ 100W/m² is suitable for providing additional warmth and comfort to the floor.

When Thermonet® EZ 100W/m² is installed in addition to a central heating system savings can often be made by reducing the temperature settings on the main system.

Depending on insulation levels, it can be used as a primary heat source in new build installations.

ENHANCE EVERY PROJECT

Enhance your project with Thermonet® electric underfloor heating. The Thermonet® feeling brings you the ultimate in comfort, luxury and after sales backup.

Our superior TwistedTwin cable is unique in the UK. You'll find marginally thinner cables, but you won't find better quality. It's also Zero EMF so doesn't emit a large electro magnetic field.

INCLUDED IN THE RANGE

- Thermonet® EZ 100W/m²
- Thermonet® EZ 150W/m²
- Thermonet® EZ 200W/m²
- Thermonet® Shower Tray Heating
- Thermonet® Wall Heating Mat

WHAT'S IN THE BOX?

- Thermonet® underfloor heating mat
- Factory test certificate
- Installation guide

HEATING PERFORMANCE

Thermonet® Electric Underfloor Heating is one of the most efficient methods of heating available.

Depending on individual requirements and building construction, Thermonet® can be installed as the primary heat source in a room. It can also be used as supplementary heating or simply just to take the chill off your floor.

MADE IN GERMANY

We make every Thermonet® mat in our German manufacturing plant and have full control over the quality of each individual mat.

Stringent quality control tests are carried out throughout the manufacturing process to ensure each and every Thermonet® mat is finished to the highest possible standards.

Every Thermonet® underfloor heating mat is tested in excess of 2500V to ensure total safety and our Lifetime Warranty gives you full satisfaction and peace of mind.

MINIMAL HEIGHT BUILD UP

Thermonet® features a 3.5mm heating cable and low profile cold tail connection to keep build up to a minimum, without compromising on quality.

Additional heating

Thermonet EZ 100W/m²

STOCK NO	SIZE M	AREA M2	OUTPUT W
111003	3 x 0.5	1.5	150
111004	4 x 0.5	2.0	200
111005	5 x 0.5	2.5	250
111006	6 x 0.5	3.0	300
111007	7 x 0.5	3.5	350
111008	8 x 0.5	4.0	400
111010	10 x 0.5	5.0	500
111012	12 x 0.5	6.0	600
111016	16 x 0.5	8.0	800
111020	20 x 0.5	10.0	1000

Technical Data

Width	500mm
Heated width	430mm
Max. thickness	3.5mm
Max. temperature*	29°C
Cable fixing	Taped
Adhesive mesh	Yes

*Regulated by floor sensing thermostat

**Minimum recommended thickness of 10mm. Contact us for other suitable floor finish and build up information.
