

DONOHUE HEATING SERVICES

ELECTRIC RADIATOR DATA SHEETS

Create the ultimate luxury bathroom with Thermonet wall heating mats. Perfect for shower cubicles and safe in wet areas.

WALL HEATING MATS

Thermonet® 150W/m² wall heating mats can be adhered onto a prepared wall surface, such as tile backer board, and tiled directly over.

Installing wall heating mats in a shower cubicle or wetroom adds an extra level of comfort and luxury to any project, as well as providing an invisible and economical heating solution.

Wall heating mats can be used in conjunction with electric underfloor heating to achieve a primary heat source where the available floor space is under 80%.

ENHANCE EVERY PROJECT

Enhance your project with Thermonet® electric underfloor heating. The Thermonet® feeling brings you the ultimate in comfort, luxury and after sales backup.

PRODUCT BENEFITS

WALL HEATING MATS

Thermonet® wall heating mats are made to your exact bespoke requirements. The 0.8m² mat is available from stock on a next day basis, however bespoke wall heating mats are subject to a 2 week lead time.

BESPOKE SIZES AND SHAPES

We also manufacture bespoke underfloor heating mats to meet the demand of unusual shaped rooms and bathroom pods in projects such as hotel chains. Contact our sales team today to find out more about our bespoke manufacturing service.

Bespoke heating mat produced for a large hotel chain

MADE IN GERMANY

We make every Thermonet® mat in our German manufacturing plant and have full control over the quality of each individual mat.

Stringent quality control tests are carried out throughout the manufacturing process to ensure each and every Thermonet® mat is finished to the highest possible standards.

Every Thermonet® underfloor heating mat is tested in excess of 2500V to ensure total safety and our Lifetime Warranty gives you full satisfaction and peace of mind.

Bespoke shower tray heat mats also available to order

Truly unique TwistedTwin conductor cable...

Thermonet are the only in wall heating mats in the UK to feature our unique TwistedTwin conductor cables. Most cables on the market have a dual conductor but as you'd expect, Thermonet has that little bit extra.

Our conductors are twisted together which eliminates electromagnetic field (EMF) and neutralises the expansion and contraction of the cable along it's entire length. This extra process results in a more robust, workable, and longer lasting cable. We're so confident in the quality of our products that we protect every Thermonet installation with a unique Lifetime Warranty for complete peace of mind.
